

# STONE LASER SYSTEM

*THE INTUITIVE AND ACCESSIBLE MEASUREMENT SYSTEM FOR THE STONE INDUSTRY*

## Stone Laser System 3.0

The Stone Laser System allows to make DIGITAL TEMPLATES straight on the job site and to send them by e-mail in DXF format directly to the office or the CNC machine.

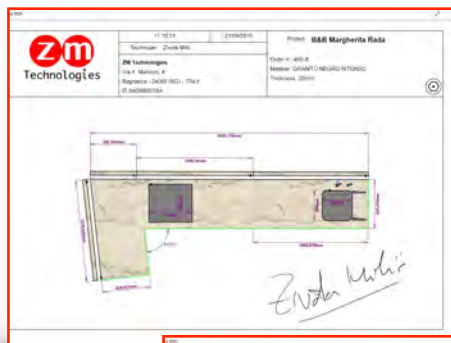

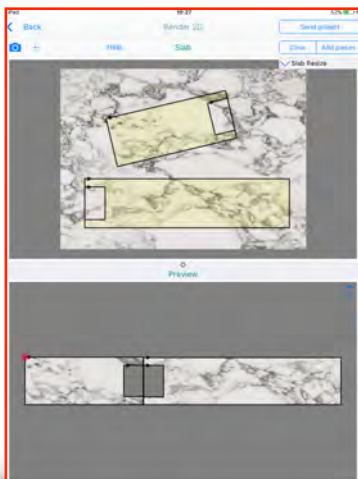

This is possible thanks to the CAD software integrated in the application that, along with the Disto laser make it possible to check, edit and complete any kind of measurements.

You can measure points and contours with high accuracy. All measurements can be exported as a DXF file.

You can choose to draw using the PARAMETRIC SHAPES or the CAD.

The software gives you the possibility to render the pieces on the slab and to include the JPG together with the DXF file in the e-mail automatically generated.

You can also create a customized dynamic library to save and store the projects.

Stone Laser APP + DISTO Laser

=

THE EASY WAY TO MEASURE

A tablet and a laser: that's the only instruments you will need to be able to measure anything from anywhere! The Laser connects to the app with Bluetooth and exports DXF files over WiFi.

With the SLS 3.0 you can instantly measure straight, curved and complex shapes on horizontal, vertical or inclined surfaces.

The **STONE LASER S910 PACKAGE** includes:

- SL3 APP
- Laser S910
- TRI 70 tripod
- GZM3 Target plate
- Professional carrying case
- Adapter FTA 360-S
- Holster
- Smart Base extension
- Handloop
- Manual on CD and Quickstarts
- Safety Instructions, PROJECT by LGS Card
- USB charger – including cable and 4 plugs (ww)
- Calibration Certificate Silver (with test measurement results)

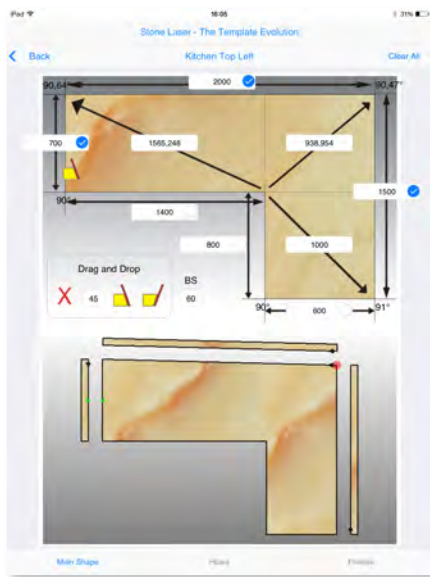

The **STONE LASER 3DISTO PACKAGE** includes:

- SL3 APP
- Laser 3D DISTO with SD WLAN card
- USB Stick
- GZM3 Target plate
- Micro USB cable for PC
- Ruler for offset point
- 3D Disto power supply
- RM100 Remote Control
- Control Unit power supply
- 3D Disto quick start
- Target marks, self-adhesive, 50units in 1 bag
- Country specific adapter plug-ins
- Control Unit with stylus, tripod clamp and hand strap
- Data CD, Safety Instructions Manual
- Power cable 3D Disto to the control Unit
- USB connection cable 3D Disto to the Control Unit
- Manual on CD and Quickstarts
- CE Producer certificate

**Save valuable time and money.  
Create digital templates quickly,  
easily and accurately.  
Use Stone Laser System.**

We provide complete solutions for countertop, stairs, swimming pool, window frames fabricators. Our accessible and user friendly system, addresses to any fabricator: small, medium or large. Whether you are running a CNC, water jet or manual operation, our measuring systems is suitable.

Stone Laser app has functions make the drawing completely ready for production in the stone industry and to digitize your project. Create a customized dynamic library to save and store projects (you can also save sinks or pieces that are used often), dimensions, create a backsplash and render the piece. These are just a few of the functions available on the Stone Laser app can be used right on-site.
